Communities Served by ACO

- Network alignment & physician engagement
 - Enable physicians to remain independent and focus on patient care and quality
 - Local physician governance
 - Transparency
 - Outcomes based incentives
- Medical management & connectivity
 - Dedicated local care management staff
 - Registries and chronic care management
 - Point of care tools, e-alerts
 - Predictive modeling
 - HIE connectivity with all provider types

Clinical Excellence

- Introducing care coordination to an unmanaged population
- Tiered outreach based on patient acuity
- Focus on care management and wellness programs
- Quality care with high patient and provider satisfaction

Operational Efficiencies

- Partner with hospitals to reduce avoidable utilization
- Improve compensation to physicians meeting three-aim goals
- E-connectivity to support care coordination and management

Primary Drivers

- Education of beneficiaries, providers and staff
- Comprehensive care
- Reduce avoidable cost
- Connectivity with all providers

Challenges

- Beneficiary engagement
 - Education on ACO and benefits of care coordination
 - No network limitations
 - Unaccustomed to active outreach
- Hospitals
 - Minimal hospital options
 - Risk adverse to any outcomes base reimbursement
- Data access and integrity
- Competing programs
 - Metrics
 - Dual eligible care coordination pilot
