DMHC announces 2013 “Right Care Initiative” award recipients

Health plans and medical groups honored for work to fight diabetes and heart disease

(Sacramento) – Today, California Department of Managed Health Care (DMHC) Director Brent Barnhart announced the recipients of the 2013 Right Care Initiative (RCI) awards. Awards are given annually to California health plans and medical groups who meet clinical performance standards for controlling blood pressure, blood sugar and/or cholesterol. Launched in 2008, RCI is a public-private collaborative effort focused on preventing premature disability and death from heart attacks, strokes and diabetic complications.

“Prevention and management of chronic conditions are key to keeping Californians healthy, improving our quality of life and reducing health care costs,” said Director Barnhart. “Today’s award winners embody how health plans and medical groups can continue to help control the effects of chronic illness and make strides towards improving the health of our state.”

The DMHC regulates managed care health plans in California, protects the rights of approximately 20 million health plan enrollees, educates consumers on their health care rights and responsibilities, and preserves the financial stability of the managed health care system. Since 2000, the department has helped more than 1 million Californians resolve health plan problems through its Help Center. Information and assistance is available 24/7 at www.HealthHelp.ca.gov or by calling 1-888-466-2219.
