

October 21, 2025

VIA ELECTRONIC COMMUNICATION - Confidential

Sonia Fernandes
Deputy Director and Chief Counsel
Office of Enforcement
Department of Managed Health Care
[REDACTED]

RE: Enforcement Matter 22-469 – Updated Combined First & Second Quarterly Public Report

Dear Ms. Fernandes:

Kaiser Foundation Health Plan, Inc. (the "Plan") submits to the Department of Managed Health Care ("Department") a public report detailing the Plan's implementation of the CAWP and progress to date, as well as planned actions, implementation timelines and measurements of those planned actions. The Plan will update its progress in the planned actions and highlight key accomplishments on a quarterly basis as required under the Behavioral Settlement Agreement.

Should you have any questions regarding this information and accompanying materials, please feel free to reach out to Ms. Deborah Espinal, Vice President of Enterprise Regulatory Services, at [REDACTED].

Regards,

Waynetta Kingsford
Senior Director
Provider Delivery Systems
Enterprise Regulatory Services
Kaiser Foundation Health Plan, Inc.

Attached:

- Plan Implementation of CAWP Progress Report

Cc: Deborah Espinal, VP of Enterprise Regulatory Services, KFHP, Inc.

Executive Summary

On October 11, 2023, Kaiser Foundation Health Plan, Inc. (“the Plan” or “Kaiser Permanente”) and the Department of Managed Health Care (“Department” or “DMHC”) reached a Settlement Agreement regarding the Plan’s provision of behavioral health care services. In accordance with this Settlement Agreement, the Plan developed, and has been implementing, a comprehensive, detailed strategy to transform the Plan’s behavioral health delivery system to improve members’ care experience and the Plan’s operations, processes, and procedures to better assist members with accessing care. Program transformation includes, but is not limited to:

1. Enhancing the Plan’s quality assurance program and its oversight of services provided by its contracted providers.
2. Streamlining and improving members’ access to behavioral health care services and the Plan’s network of providers, including external contracted providers.
3. Refining the Plan’s grievance and appeals process to support timely adjudication of complaints.
4. Ensuring the Plan’s coverage of behavioral health services remains compliant with evolving behavioral health care laws and regulations, including state and federal parity laws.

The Plan’s action plan is fully explained in the Plan’s Corrective Action Work Plan (CAWP) posted to the Department’s [website](#).

Pursuant to Sections 104 and 105 of the Settlement Agreement, the Plan retained Berkeley Research Group and Matosantos Consulting, Inc.¹ to assist the Plan in meeting the terms of the Settlement Agreement. Berkeley Research Group’s support has focused on data assessments. Initially, Matosantos Consulting, Inc. assisted the Plan in its development of the CAWP and is supporting the Plan’s implementation of the CAWP. Boston Consulting Group (BCG) now provides independent perspectives and observations regarding Kaiser Permanente’s efforts, progress towards goals identified in the CAWP, the Plan’s structure for delivering change and outcomes, and offers actionable recommendations to drive change more effectively. As set forth in Sections 109 and 110 of the Settlement Agreement, the Plan and BCG will provide the Department with status updates and progress reports on CAWP implementation on a quarterly basis. This report constitutes the first and second quarterly status reports submitted pursuant to Section 109 of the Settlement Agreement.

Summary of CAWP Progress and Milestones

Since signing the Settlement Agreement, the Plan has implemented a series of changes and enhancements to improve member access to behavioral health services and to support transformation of its program. Specifically, Kaiser Permanente has:

1. **Expanded Network:** Since the DMHC initiated its non-routine survey of the Plan’s behavioral health services in 2022, Kaiser Permanente has substantially expanded its network, added thousands of externally contracted providers and hiring hundreds of mental health therapists. By the Summer of 2024, Kaiser Permanente added nearly 8,100 mental health providers to its network. Since then, Kaiser Permanente has added another 9,300 providers for a total addition of over 17,000 mental health providers across its entire network since 2022. The current priority is on continued refinement of the network, with focus on members’ needs such as location, clinical specialty, and availability.
2. **Mechanisms for Oversight and Accountability:** The Plan has hired Vice Presidents of Behavioral Health and Wellness to oversee the Plan’s behavioral health operations in Northern and Southern California, hired a Vice President and Associate Chief Medical Officer for Mental Health and Wellness that supports quality, and built teams of subject matter experts with expertise in clinical aspects of behavioral health, data and analytics, and program management. As a part of its quality assurance program, the Plan has conducted over 20,000 behavioral health treatment plan audits from Q4, 2024-Q1, 2025. In addition, the Plan is leveraging direct access to claims and appointment data, new analytical resources, and findings from field presence and/or from expanded, comprehensive audits of member charts, to conduct more timely, rigorous, and effective oversight of its behavioral health services.
3. **Review of Member Journey:** The Plan conducted a comprehensive assessment of the members’ journey-to-care to understand pain points and identify concrete opportunities for improvement. It engaged a global consulting firm to gather feedback from current and former Plan members, conduct analyses, and support development of system

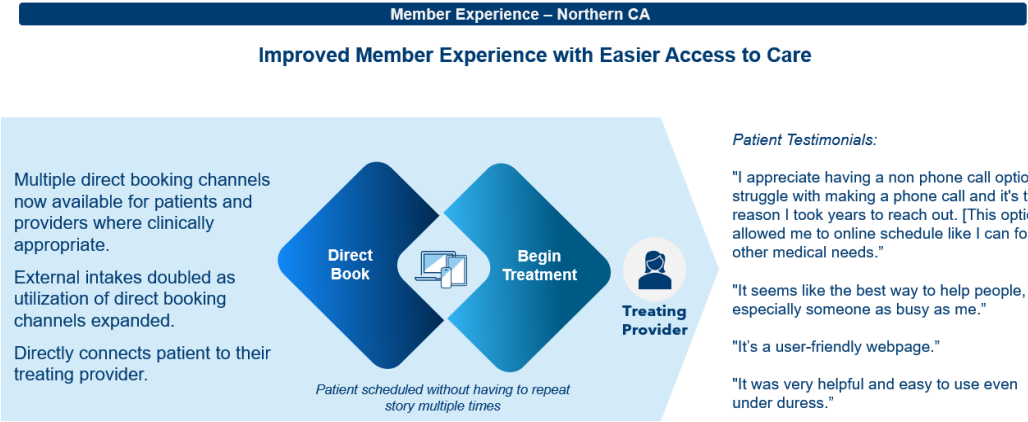

¹ Ana Matosantos has since joined Boston Consulting Group (BCG) with the same scope of work. Future references for this work will be to BCG.

improvements. Surveys were sent to 380,000 current and former members. More than 6,000 survey responses were received and analyzed, millions of encounters and claims data were analyzed, and dozens of in-depth interviews were conducted. The consulting firm also conducted a competitor analysis to capture current market realities and competitor offerings. Valuable insights were gathered through the interviews, anonymous survey data, and analysis of member complaints, grievances, and appeals.

4. **Improved Access to Services:** The Plan has implemented a series of changes to make it easier for members to access services as illustrated below. Those changes include:
- a. Redesigning and launching an improved front door to services in Northern California so that members experience fewer touchpoints and redundancies prior to starting treatment.

- b. Improving the member experience with easier access to care in Northern California through capacity for self-guided e-booking of initial appointments and a single phone number for members to access services. Implementation of the single phone number is under way and will be completed by November 2025.

- c. Improving the member experience with easier access to care in Southern California through direct booking of virtual and face-to-face visits (with our in-network providers). Today, over 98% of members referred in-network in Southern California are directly booked. An additional improvement in Southern California is the capacity for e-booking for follow-up appointments. E-booking offers members the opportunity to schedule their follow-up appointments via KP.org. It also allows the member to receive notification if a sooner appointment becomes available.

Expansion of Direct Booking & E-Booking Capabilities

Direct Booking

Since 2019, members have been directly booked with external providers via the Lucet platform. By 2022, 78% of external referrals were booked this way.

In early 2024, the RULA direct booking tool launched for virtual appointments, followed by face-to-face bookings in early 2025.

Today, over 98% of externally referred members are directly booked. Those not booked follow a standardized referral process.

E-Booking

Beginning in 2022, SCAL implemented an automated scheduling service for internal patients with established care to book virtual follow-up appointments through KP.org.

E-booking also offers members who would like to request a sooner appointment the option of a FastPass, which notifies a patient if a sooner appointment becomes available through an email or text message.

Patient Benefits: Improved access to care, streamlined referral process, enhanced digital experience

- d. Updated kp.org landing page to include a visible, easy to find link to the mental health services page. The mental health services page includes appointment scheduling, Headspace 24/7 emotional support, emotional wellness and self-care apps, online classes, and mental health assessments.
- 5. **Grievances and Appeals:** Behavioral Health and Wellness teams review complaints and grievances daily to identify patterns and facilitate timely, appropriate resolution.
- 6. **Building Pipeline of Mental Health Clinicians:** Kaiser Permanente is committed to addressing statewide shortages of behavioral health providers by actively supporting several workforce development initiatives, including the Kaiser Permanente Mental Health Scholars Academy. Currently, 321 students are enrolled in the program statewide.
- 7. **Retrospective Reimbursement:** The Plan has implemented a process for members to request reimbursement for costs associated with out-of-network care. Notices were issued to eligible members on July 31, 2025.
- 8. **Strike Preparedness:** Kaiser Permanente prepared for and managed a 29-week strike of non-physician mental health professionals in Southern California.
 - a. A focus on member experience during the recent work stoppage in Southern California verified members were offered timely appointments, were provided with clear contact information, and were followed up with regularly.

Below is additional detail on the Plan’s implementation of the CAWP and progress to date, as well as planned actions, implementation timelines and measurements of those planned actions. The Plan will update its progress in these planned actions and highlight key accomplishments on a quarterly basis as required under the Settlement Agreement.

Corrective Action Area #1: Oversight

This corrective action area includes actions the Plan is taking to strengthen and expand its behavioral health oversight and improve its quality assurance program. Specifically, the Plan is making the following investments and changes:

1. **Stronger Committees:** Expand the scope and function of Regional Behavioral Health Quality Oversight Committees to oversee a broader range of behavioral health performance metrics, program effectiveness, and corrective actions. Expand the information and data visible to the regional Access Committees, the Member Concerns Committees, and the Credentialing Committees. Conduct critical analysis of charters, policies and procedures, membership, reporting, metrics, and escalation processes to validate committees have the necessary inputs, tools, and membership to conduct thorough reviews of behavioral health activities and to issue and monitor corrective actions when required. The Quality and Health Improvement Committee of the Plan's Board of Directors will review the gap analysis and adopt any recommended changes.
2. **Regional Behavioral Health Teams:** Establish, maintain, and appropriately resource new regional behavioral health teams to engage in continuous performance review and enhanced oversight. The teams will be led by Vice Presidents of Behavioral Health and Wellness, independent from the Medical Groups, who are accountable for all areas of behavioral health, including access, member experience, and parity. Hire a statewide Vice President, Associate Chief Medical Officer of Mental Health & Wellness, independent from the Medical Groups, to serve as a clinical quality advisor to the VPs of Behavioral Health & Wellness.
3. **Expanded Data Analytics:** Enhance data sharing between Health Plan and Medical Groups. Expand reporting from externally contracted providers including metrics on initial and follow-up access, complaints and grievances, and quality of care. Standardize reporting of timely data regarding the provider network. Regularly review data to assess key areas of performance and quality to highlight opportunities to improve care delivery and close any gaps in the delivery system at the different points in the member's journey. Implement a single monitoring tool to measure current access availability and to forecast future access needs.
4. **Field Presence:** Expand field presence through (1) focused quality visits, and (2) assessment of internal and external virtual care platforms. Focused visits may include chart audits, monitoring of access and booking practices, and reviews of policies and procedures. Conduct comprehensive quality visits when issues or non-compliance are identified through data analysis, chart reviews, complaints and grievances or other oversight activities.
5. **Audits (Increased Quality efforts):** Expand the scope, number of chart audits in the audit program to include: (1) adding an additional metric to treatment plan audits to confirm a member is being offered the course of treatment recommended by the member's treating provider; (2) increasing the volume and frequency of audits in the external provider network to better align with external referral volumes; (3) auditing out-of-network referrals to track trends and member care needs and evaluate opportunities to expand in-network offerings to meet members' evolving clinical needs; (4) expanding current risk assessment audit to encompass initial and follow-up non-physician appointments booked outside of timely access requirements and (5) expanding current risk assessment audit to track that suicide risk assessments are appropriately documented.
6. **Focused and Continuous Improvement:** Expand monitoring of the external provider network to include: time to initiation of visit, connection rates, and continuity of care processes.
7. **Greater accountability:** Improve corrective action processes so effective action is taken where noncompliance and opportunities for improvement are identified. In corrective action plans, require identification and documentation of root causes and that interventions be documented, implemented, and monitored. Establish progressive escalation process to support effective and prompt action to prevent and remedy issues. Identify areas for improvement of corrective action processes and make changes to effectively monitor implementation of CAP's and quickly adjust to close any remediation gaps. Make any necessary changes to policies, procedures or processes to address gaps or needed improvements with the network. Review, and as needed, update contracts with external network providers to incorporate additional quality oversight requirements and to include sufficient specificity regarding consistent corrective action management processes. Specify pathways and levers the Plan will use the following circumstances: (a) if corrective action plans and the targeted strategies are not remedying deficiencies identified in a timely manner; (b) if there are serious issues adversely impacting member care; (c) to directly intervene to confirm members' needs are met and so the Plan is fulfilling its obligations under the Settlement Agreement and the law.

8. **Appointment Access Compliance (including urgent appointments):** Develop and implement a robust measurement mechanism to oversee its behavioral health access compliance for follow-up appointments. Identify first-offered appointments and follow-up appointments to confirm timely access standards are met. Differentiate between and document (1) appointments where members were offered a timely appointment within the timely access standards but chose an appointment outside the timely access standards; (2) those instances where a timely appointment was not available and a provider did not document a non-detriment statement; and (3) those instances where a timely appointment was not available or not offered to the member, but the provider did note a non-detriment statement. Develop and implement a single monitoring methodology for initial appointments that is compliant with timely access standards and used statewide for reporting when appointments are first offered, consistent with California Senate Bill 221 (“SB 221”).
9. **Suicide Risk Assessment:** Confirm and implement appropriate processes, policies and systems to effectively and efficiently evaluate screening and assessment for suicide risk. Expand efforts to support consistent, appropriate and quality care, including the evaluation of audit parameters, expanding the use of chart audits and the imposition of corrective action plans to verify that members are receiving clinically appropriate suicide risk screenings.
10. **Utilization Management:** Review policies and procedures concerning UM/UR to confirm Senate Bill 855 (“SB 855”) parity laws and regulations are up to date and approved by the appropriate regional committee. Conduct ongoing mandated training based upon updated policies and procedures regarding SB 855 and inter-rater reliability (“IRR”) to impacted staff. Present SB855 training and IRR compliance to the regional Behavioral Health Quality Oversight Committee. Utilize learnings and best practices from statewide BH decision-making committee to drive consistency in UM/UR decisions in connection with all covered health care services and benefits for the diagnosis, prevention, and treatment of mental health and substance use disorders in children, adolescents, and adults, including through IRR testing of individual decisionmakers. Present learnings and best practices will be presented to the regional Behavioral Health Quality Oversight Committee on a quarterly basis.

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
Stronger Committees (CAWP 1(A) p.9)	<ul style="list-style-type: none"> Completed analyses of committee charters, policies, procedures, membership, reporting metrics and escalation processes. Report with recommended changes so committees have the input, tools and membership to perform specified oversight functions, including changes to improve corrective action plans and to monitor implementation. Documented review of the gap analysis and adoption of recommended changes by the Quality and Health Improvement Committee (QHIP) of the Board of Directors. Expanded scope of Behavioral Health Quality Oversight Committee (BHQOC), including review of program effectiveness. 	<ul style="list-style-type: none"> The Plan launched analyses of committee charters, policies, procedures, membership, reporting metrics and escalation processes. The Plan is in the process of completing the review of BHQOC’s existing reports, metrics, and membership. It has completed a preliminary review of BHQOC charters, reporting, metrics, and escalation processes and BHQOC membership and identified needed changes to better align between NCAL and SCAL. 	<p>Initiated: Q2 2025</p> <p>Completion: Q3 2026</p>

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
Regional Behavioral Health Teams (CAWP 1(B) p.10)	<ul style="list-style-type: none"> Establishment of behavioral health teams Hiring of Regional Vice Presidents and statewide Vice President. 	<ul style="list-style-type: none"> The Plan hired Regional behavioral health Vice Presidents and the Statewide Physician Vice President. The Plan built teams of subject matter experts with expertise in clinical aspects of behavioral health, data and analytics, and program management staff. The Plan stood up team infrastructure to support ongoing monitoring and review of behavioral health performance across the state. An example of this increased monitoring occurred during the Southern California National Union of Healthcare Workers (NUHW) work stoppage, when the Plan increased oversight of rescheduling practices for members impacted by the work stoppage through chart reviews and monitoring of outbound calls to ensure alternative services were offered timely. 	<p>Initiated: Q1 2024</p> <p>Completed: Q4 2024</p>
Expanded Data Analytics (CAWP 1(C) p.10)	<p>Documented examples of:</p> <ul style="list-style-type: none"> Inventory for existing metrics and performance standards. Analysis of current metrics and performance standards against needed metrics and standards. Recommended changes and improvements. Documentation for corrective actions and escalations, and consistent review of data identified in CAAs 2, 3 and 4. 	<ul style="list-style-type: none"> The Plan has completed an inventory of all existing metrics and performance standards. The Plan has completed and will continue to complete regular review of available and necessary data to assess key areas of performance. 	<p>Initiated: Q3 2024</p> <p>Completion: Q3 2026</p>
Field Presence (CAWP 1(C) p.11)	<ul style="list-style-type: none"> Expand the number of quality visits being conducted. Demonstrate evidence of comprehensive quality visits when issues or non-compliance are identified through data analysis, chart reviews, complaints and grievances or other oversight activities. 	<ul style="list-style-type: none"> The Plan has completed and will continue to perform ad-hoc site visits to in-network higher-level of care behavioral health facilities. As part of the Southern California strike, the Plan completed re-entry call shadowing. 	<p>Initiated: Q3 2024</p> <p>Completion: Q4 2025</p>

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
Audits (Increased Quality Efforts) (CAWP 1(C) p.12)	<ul style="list-style-type: none"> • Expand volume of chart audits. 	<ul style="list-style-type: none"> • The Plan has increased the volume of audits for the external provider network by at least 100%. 	Initiated: Q4 2024 Completed: Q3 2025
Audits (Increased Quality Efforts) (CAWP 1(C) p.12)	<ul style="list-style-type: none"> • The Plan has expanded treatment plan audits to include additional metrics. • Analyses of audit results to confirm applicable standards are being met. • Assessment of opportunities and gaps to determine whether corrective action plans need to be issued. • Documentation of ongoing monitoring for performance improvement and actions to be completed if corrective action plans are issued. 	<ul style="list-style-type: none"> • The Plan has expanded treatment plan audits to include additional metrics. • The Plan is analyzing and reporting audit results, at least, a monthly basis. 	Initiated: Q4 2024 Completion: Q3 2025
Focused and Continuous Improvement (CAWP 1(D) p.12)	<ul style="list-style-type: none"> • Inventory of existing access to data, policies, and procedures. • Analysis of current access data against needed data. • Recommended changes and documented improvements implemented. • Documentation of analysis and reviews of available data and its alignment to what is needed for effective oversight. 	<ul style="list-style-type: none"> • The Plan has conducted a data needs assessment and has mapped those needs to the commitments in the CAWP. • The Plan has substantially expanded its direct access to data across the provider network including data reflecting provider recommendations, treatment progress, and overall member experience. • The Plan continues to systematically expand its access to necessary data and to have that access to this data be consistent statewide where feasible. • The Plan has expanded its ability to conduct real-time analysis of services and visit information. • Kaiser Permanente is regularly monitoring appointment availability against member demand for behavioral health services, using data reports from medical groups, and the Plan. • The Plan conducted oversight of rescheduling practices for 100% of members impacted by the Southern California strike. 	Initiated: Q4 2024 Completion: Q3 2026

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
		<ul style="list-style-type: none"> The Plan has increased the volume of audits for the externally contracted provider network by at least 100% since 2023. 	
Greater Accountability (CAWP 1(D) p.13)	<ul style="list-style-type: none"> Documented changes based on review of existing Corrective Action Plan (CAP) processes, gaps, recommendations and improvements. Documented progressive escalation process and identified potential interventions to remedy issues identified. Member concerns raised to executive leadership are handed off to regional Behavioral Health (BH) teams and resolved in real-time. Number of CAPs issued, duration of CAPs, time to implement the CAP, and any recurrence of problems previously addressed in a CAP. Documentation of subsequent reviews to determine if issues previously addressed in a CAP have recurred. Documented review of performance data, complaints and grievances, survey data and other information to evaluate whether previously identified challenges have recurred or whether CAPs have resulted in sustainable changes. Documented review of performance data, complaints and grievances, survey data and other information to evaluate whether issues that were previously escalated have recurred. 	<ul style="list-style-type: none"> The Plan has strengthened progressive escalation processes to support more effective and prompt action when issues arise. While it has improved existing processes and used them, the Plan is further strengthening these processes. The Plan will be documenting its updated progressive escalation pathways and regularly escalating issues as needed to meet member needs. To date, escalation efforts have been effective, and issues have been resolved by the Regional Teams and Medical Groups without requiring further escalation to Executive leadership. The Plan reviews member complaints and grievances related to behavioral health daily. As a result of daily review, issues related to clinical risk are escalated and resolved appropriately. Member concerns raised to executive leadership are handed off to regional Behavioral Health (BH) teams and resolved in real-time. During the strike in Southern California, Kaiser Permanente established a specialized process for all escalations including formal expectations of resolution and turnaround times. This process included categorization, overall expectations on timeliness of response and resolution based on that categorization, pattern identification, and a verification from BH teams that resolution was timely and addressed in every instance. Further, agreement was established that should these escalations not be addressed in a timely manner, they would be 	<p>Initiated: Q2 2024</p> <p>Completion: Q1 2026</p>

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
		progressively escalated further starting with the Behavioral Health & Wellness Executive Director and Vice President. The Plan focused on understanding trends around escalations and established processes to identify and address any gaps and to speed up resolution. If trends around escalations were identified throughout the strike, communication processes were activated so all teams were aware of any indication of systemic issues to assist in gap identification and quick resolution.	
Appointment Access Compliance (including Urgent Appointments) (CAWP 1(E) and 1(F) p.14)	<ul style="list-style-type: none"> • Documentation of current mechanisms and gap analysis. • Report with recommendations. • Documentation of implemented changes. • Report and conclusions from systemic evaluation of access to urgent services. • Documentation of updated data requirements, monitoring processes and evidence of regular review of performance and documentation. • See increased documentation and access metrics referenced below (CAA 2 and 3). • Documentation of changes to scope and volume of audits. 	<ul style="list-style-type: none"> • A robust measurement mechanism has been established for use statewide to oversee behavioral health access compliance for timely access to follow up appointments. Specifically, the Plan has instituted data capture mechanisms and requirements for all intake and follow up provider notes. Clinicians are required to document their clinical recommendations, which might include return to individual therapy or other recommendations. If the clinician selects Individual Therapy as the recommended follow up, the clinician is required to confirm whether it is clinically recommended that a member return within 10-days or whether there is no detriment to the member to return beyond 10 days. The results of the 10-day recommendation and whether a member was, indeed, scheduled within 10 days gets reported out in the appropriate committee. • The Plan conducts monthly audits to review the data identified above and to assess if proper documentation procedures are followed in both intake and follow-up encounters and to confirm members are booked for a follow-up appointment within the timeframe recommended by the treating provider. 	<p>Initiated: Q1 2024</p> <p>Completion: Q3 2026</p>

Corrective Action	Measurement	Progress	Anticipated Initiation and Completion Date
Suicide Risk Assessment (CAWP 1(G) p.15)	<ul style="list-style-type: none"> • Inventory of existing policies and procedures related to Behavioral Health Suicide Screening and Risk Assessment. • Documentation of any improvements needed in P&P. • Evidence of implementation of recommended changes. • Evidence of chart audits for risk assessment and suicide screening documentation. 	<ul style="list-style-type: none"> • The Plan completed an inventory of all existing policies and procedures related to Behavioral Health. • The Plan expanded the volume of risk assessment chart audits. 	<p>Initiated: Q1 2025</p> <p>Completion: Q2 2026</p>
Utilization Management (CAWP 1(H) p.15)	<ul style="list-style-type: none"> • Inventory of existing policies. • Review of policies and procedures and documented gaps, if any. • Documentation of implemented changes. • The Plan completed implementation of a chart audit expansion to include confirmation that members received recommended treatment plans. • Documentation of process to evaluate application of UM decision making criteria. • Documentation of testing of protocols for IRR testing of physicians and licensed staff involved in decision making. • Evidence of implementation of testing protocols and any necessary actions to further strengthen training. Identify any elements of the Knox-Keene Act that must be in policies and procedures, the schedule for changes and evidence of changes when they have been implemented. • Quarterly report to BHQOC with learnings and best practices from statewide decision-making committee. • Evidence of chart audits to confirm members receive recommended treatment plan. 	<ul style="list-style-type: none"> • The Plan completed an inventory of existing policies. • The Plan has validated that SB 855 nonprofit clinical criteria trainings are available to its providers (i.e. LOCUS, CALOCUS, ASAM, etc.). • The Plan completed ongoing documentation of volume of training sessions conducted and number of staff trained. This report is presented to BHQOC. • The Plan completed implementation of a chart audit expansion to include confirmation that members received recommended treatment plans. 	<p>Initiated: Q3 2025</p> <p>Completion: Q2 2026</p>

Corrective Action Area #2: Access

This corrective action area includes actions the Plan is taking to improve member access to behavioral health appointments and to confirm behavioral health services are available consistent with good professional practice and timely access standards. Specifically, the Plan is making the following changes and investments:

1. **Improved Provider Network:** Expand external contracted provider network and increase internal staffing. Refine and manage provider network to maintain continued access for members. Launch, refine and update at least on a monthly basis, a comprehensive, detailed supply and demand dashboard to inform strategic network management, contracting, and staffing decisions. Confirm clinicians have sufficient return access availability.
2. **Timely Access Enhancements:** Strengthen and standardize policies regarding timely access. Strengthen and standardize policy re: individualized BH needs and determinations. Arrange out of network if timely access cannot be met.
3. **Improvements to Autism Spectrum Disorder Treatment Access:** Conduct inventory of policies and procedures for autism services. Document any improvements needed in P&P review. Document implementation of recommended changes to P&P.
4. **Collaborative Care Treatment Models:** Created the ADAPT (Achieving Depression and Anxiety Patient-Centered Treatment) program based on the evidence-based model Collaborative Care to provide virtual, evidence-based treatment to effectively treat patients with mild to moderate depression and/or types of anxiety to remission.
5. **Increased Monitoring of Access:** Monitor, at least monthly, each medical center’s compliance with the 10-day regulatory timely access requirements for behavioral health appointments. Monitor on a monthly basis documentation of non-detriment for initial access and SB221 standards. Conduct analysis of compliance with timely access requirements and non-detriment requirements across the externally contracted network that is comparable to the monitoring of performance of each medical center as described above. Regularly measure whether Initial and Follow Up appts are provided in compliance with timely access requirements.
6. **Improved documentation and Oversight:** Strengthen documentation requirements related to initial requests for appointment. Strengthen chart reviews & escalation process.
7. **Make it Easier for Members to Access Care:** Conduct end-to-end review of the member journey. Implement single phone number for booking appointments. Expand direct booking and e-booking.
8. **Continued Enhancements of Access to Care:** Conduct feasibility study on booking multiple successive appointments. Evaluate existing appointment booking programs. Make enhancements to kp.org.

Corrective Actions	Measurement	Progress	Anticipated Completion Date
Improved Provider Network (CAWP 2(A) p.16)	<ul style="list-style-type: none">• Available supply of initial and follow-up appointments across the Plan’s entire network. Such measurements must at least include detailed information on appointment supply, the percentage of appointments meeting regulatory access standards, capacity of the current network, and staffing.	<ul style="list-style-type: none">• Since 2022, Kaiser Permanente has increased the number of individual non-physician mental health providers by approximately 17,400. Specifically, it added nearly 8,100 mental health providers to its network by August of 2024 and has added another 9,300 providers since then. Kaiser Permanente continues to refine its provider network to meet member access and treatment needs.	Initiated: Q1 2022 Completed: Q3 2024

	medical group performance and actions to support.		
Make it Easier for Members to Access Care (CAWP 2(C) p.19)	<ul style="list-style-type: none"> • Documentation of assessments related to reviews of member satisfaction. • Evidence of continued implementation of single phone number, e-booking, and direct booking improvements. • Documentation of review of direct booking volumes. 	<ul style="list-style-type: none"> • The Plan has completed end-to-end review of the member journey. • The Plan has expanded e-booking functions for follow-up visits. For example, the Plan has an Automated Scheduling service that allows for direct virtual booking of future appointments while also providing an option for members to join an automated, sooner appointment list. This option is convenient, easy, and reduces potential wait times. • Kaiser Permanente has centralized its call centers for behavioral health both in Northern California and Southern California. It has implemented a single phone number for accessing behavioral health services in Southern California and will complete the implementation of a single phone number in Northern California later this year. • Kaiser Permanente is implementing a number of improvements in the entry pathway to behavioral health services in Northern California. The changes to streamline initial access to care in Northern California are expected to be completed by year-end. • Kaiser Permanente has expanded direct booking capabilities with Rula and Lucet vendors in SCAL. 	<p>Initiated: Q1 2022</p> <p>Completion: Q3 2026</p>
Continued Enhancements of Access to Care (CAWP 2(C) and 2(D) p.19 & 20)	<ul style="list-style-type: none"> • Assessment of scheduling multiple follow-up appointments in advance. • Evidence of review of existing appointment booking programs. • Enhancements to kp.org. 	<ul style="list-style-type: none"> • Kaiser Permanente has completed the design for implementation of a multiple appointment feasibility study. It plans to launch study in Q3, 2025. • The Plan has updated the kp.org landing page to include a visible, easy to find link to the mental health services page. The mental health services page includes appointment scheduling, Headspace 24/7 emotional support, crisis hotline (SCAL), emotional wellness and 	<p>Initiated: Q3 2025</p> <p>Completion: Q2 2026</p>

Corrective Actions	Measurement	Progress	Anticipated Completion Date
		self-care apps, online classes (SCAL), mental health assessments, and appointment status. • Kaiser Permanente has expanded digital resources on kp.org for common mental health conditions.	

Corrective Action Area #3 Network and Referrals

This corrective action area includes actions the Plan is taking to improve member access to its network and to make it easier for members to access out-of-network providers when it cannot offer timely care in network. Specifically, the Plan is making the following changes and investments:

- 1. **Increase Providers and Improve Pipeline:** Substantially increase network of behavioral health providers to increase capacity and confirm diverse expertise to treat Plan members. Refine and as needed, expand provider network to adhere to timely access to diverse specialty offerings. Expand the pipeline of qualified, experienced, and diverse mental health professionals in California through efforts like the Kaiser Permanente Mental Health Scholars Academy (MHSA).
- 2. **Improve Access to External Network:** Improve processes to review, monitor, and oversee referrals to external contracted and out-of-network behavioral health providers. Evaluate referral processes, updating member and provider-facing communications, and take steps to streamline workflows to meet timely access standards and other regulatory requirements. Confirm that decisions around whether to refer a member to an external provider are not based solely on determinations around acuity. Monitor, at least on a monthly basis, referrals to the external network through auditing, data analysis, and chart reviews. Monitor external contracted referrals, as well as healthcare documentation and leverage data to confirm members are offered appointments within timely access standards, including SB 221 and SB 855 requirements. Monitor external contracted and out-of-network referrals to identify opportunities to improve network to better meet members’ dynamic clinical needs.
- 3. **Access to Out of Network Providers:** Improve the process for initiating and managing letters of agreement with out-of-network providers/facilities. Track monthly volumes of Letters of Agreement (LOA), including to which providers/facilities, and the reason for referral. Monitor out-of-network referrals, as well as healthcare documentation and leverage data to confirm members are offered appointments within timely access standards, including SB 221 and SB 855 requirements.
- 4. **Monitoring of Network:** Expand existing efforts to assess demand for in-person and virtual behavioral health services against its network capacity at least on a quarterly basis. The Plan will independently review supply and demand data, identify trends, and create reports regarding the Plan’s behavioral health provider network. The Plan will review data, analytics, and reports and regularly take action to address identified opportunities with its provider network, to meet members’ access needs.
- 5. **Improve Processes Relating to External Network:** Monitor and update external provider network roster to identify active contracted individual providers, groups, and facilities, including credentialing status. Streamline external provider credentialing, recredentialing and contracting processes. Evaluate current provider contracting and credentialing processes and procedures to identify barriers and opportunities for optimization. Improve processes to strengthen oversight, support high-quality care, and increase accountability. Assess whether contract terms need to be updated to facilitate additional data transparency and oversight, including relating to access and quality. Consider strategies to better incorporate external behavioral health provider network into Kaiser Permanente’s integrated system of care to better manage the patient’s overall health. Explore a value-based system with the external provider network.

	<ul style="list-style-type: none"> Current volume of providers including year-over-year enrollment. 	degrees and the extra training required by the state so they can transition to careers in mental health – with nearly 150 recent graduates and more than 200 employees currently enrolled.	
Improve Access to External Network (CAWP 3(A) p.22)	<ul style="list-style-type: none"> Document evaluations of referral processes, recommendations, and actions on recommendations. 	<ul style="list-style-type: none"> As noted in CAA #1 and CAA #2, the Plan is continuously reviewing its network's performance and compliance with access requirements. It reviews available supply, for initial appointments, follow-up appointments, and urgent appointments. It also reviews appointments booked outside of regulatory standards. As noted above, the Plan has been meeting consistently Knox-Keene Act access requirements. Specifically, between December 2024 and March 2025, it met or exceeded requirements for access to initial and follow up care, urgent care, and non-urgent care with a performance ranging from 89 percent to 100 percent. The Plan leverages its direct access to data, expanded audits, and reviews of grievances and complaints as part of its continuous reviews. Going forward, the Plan will also have the benefit of insight from member survey data. 	<p>Initiated: Q3 2024</p> <p>Completion: Q3 2026</p>
Access to Out of Network Providers (CAWP 3(A) p.23)	<ul style="list-style-type: none"> Documented methodology, procedures, and evidence of implementation of monthly tracking of letter of agreements (LOAs), reviews conducted and summary of findings. 	<ul style="list-style-type: none"> Kaiser Permanente has implemented processes to help support members transitioning to non-network provider care when appropriate. 	<p>Initiated: Q3 2024</p> <p>Completion: Q3 2026</p>
Monitoring of Network (CAWP 3(A) p.23)	<ul style="list-style-type: none"> Document methodology, protocols, and evidence of implementation of independent plan review of supply and demand data, trends, and findings. Document analyses include a wide range of inputs including complaints and grievance data, 	<ul style="list-style-type: none"> The Plan has completed and will continue to complete regular independent reviews of appointment supply against demand to assess compliance with timely access standards, and network adequacy. 	<p>Initiated: Q1 2024</p> <p>Completion: Q3 2026</p>

Corrective Action	Measurement	Progress	Anticipated Completion Date
	findings from chart reviews and audits, access reports, and member satisfaction surveys. • Document Plan actions in response to its findings.		
Improve Processes Relating to External Network (CAWP 3(A) p.24)	<ul style="list-style-type: none"> • Documentation of regular updates to provider network roster. • Review of credentialing and contracting processes and documentation of findings and recommended changes, if any. • Assessment of contract terms recommended changes, if any, and documentation of changes implemented. 	<ul style="list-style-type: none"> • Kaiser Permanente has completed maintenance of the provider directory; updates are conducted on an ongoing basis. • Kaiser Permanente has initiated review of contracting and credentialing processes to identify areas of opportunity and improvement. The review is currently in progress, with completion and documentation of final recommendations planned by the end of this quarter. • Kaiser Permanente has completed an initial review of contract terms with external providers. Final recommendations, if any, will be completed by the end of this quarter. 	<p>Initiated: Q2 2025</p> <p>Completion: Q3 2026</p>
Claims Reimbursement Process (CAWP 3(B) p.24)	<ul style="list-style-type: none"> • Documentation of a process for evaluating enrollee out-of-network claims for reimbursement. 	<ul style="list-style-type: none"> • The Plan has implemented a process for members to request reimbursement for costs associated with out-of-network care. Notices were issued to eligible members on July 31, 2025. 	<p>Initiated: Q3, 2025</p> <p>Completion: Ongoing</p>

Corrective Action Area #4 Grievance and Appeals

This corrective action area includes actions the Plan is taking to improve the grievance and appeals process. Specifically, the Plan is making the following changes and investments:

- 1. **Process Improvements:** Create Behavioral Health Complaints, Grievances, and Appeals (CGA) process map including an escalation pathway for timely appointments. Develop and implement a process to identify and fast track resolution of any grievances related to access challenges faced by members. Flag any member grievances that suggest access challenges, such as timely access to appointments, scheduling concerns, the cadence of follow-up care, and transitions between levels of care, for handling by specially trained grievance coordinators and escalation to appropriate clinical department staff to assist member needs. Institute a consistent procedure to verify that all members who file a grievance regarding timely access are reviewed by a clinician for risk assessment and steps are taken to meet each member’s behavioral health needs.
- 2. **Education, Training and Evaluation:** Establish and implement specialized training and escalation processes for Behavioral Health. Launch a statewide committee focused on evaluating behavioral health grievances. The Plan is creating educational materials and toolkits on how members can get questions answered, and how to access and navigate the member grievance process. The Plan is developing a robust set of materials geared toward provider education which will provide information to the Plan’s network of providers regarding regulatory requirements.

Corrective Actions	Measurement	Progress	Anticipated Completion Date
Complaints, Grievances, and Appeals Process Improvements (CAWP 4(A) p.25)	<ul style="list-style-type: none">• Documented process map for member complaint, grievance, and appeals.• Documented areas of improvement to expedite member timely access and risk concerns.• Documentation of volume for complaints and grievances related to timely access.• Documentation of improvements to workflows to fast-track resolution and member experience.• Documentation of health plan audit of risk escalation to clinical teams.• Documentation of audit of new workflows to expedite member complaints and grievances related to timely access.	<ul style="list-style-type: none">• The Plan has completed an initial statewide process map of the behavioral health complaint, grievance, and appeals workflows. The current version is being validated and refined.• Kaiser Permanente developed job aids and workflows to identify and escalate requests from members who want sooner appointments. 		conducts weekly reviews of commercial grievances to identify and understand patterns. Opportunities learned from these reviews are shared with behavioral health leadership for continuous improvement and to enhance the member experience.	

Corrective Action Area #5 Future Strike Contingency

This corrective action area includes actions the Plan is taking to develop a comprehensive contingency plan to be implemented in the event of labor work stoppages. Specifically, the Plan is making the following contingency plans:

1. **Strike Contingency Planning:** Promptly communicate the potential impact of strike through a multi-pronged communication campaign. Review and update member communications process. Confirm member notification regarding work stoppage via digital and verbal means, including instructions to members on how to escalate concerns. Update Member Services scripting & FAQ. Closely monitor member concerns and resolve member issues in real-time. Develop and implement a regional incident management structure. Establish capacity for monitoring of strike-related concerns via documentation processes. Provide work stoppage guidance to staff. Focus on offering timely access & document all efforts to contact members.

Corrective Action	Measurement	Progress	Anticipated Completion Date
Strike Contingency Planning (CAWP 5 (A-D) p.28-32)	<ul style="list-style-type: none">• Documentation of Health Plan call shadowing to confirm adequate communication and re engagement of members.• Completion of scripting and FAQ information.• Documentation of Health Plan daily review of CGAs to track coordination with the Medical Groups to resolve member issues timely.• Documented uniform reporting structure to oversee access, member issues, and escalations during the work stoppage.• Documentation of procedures to track member concerns throughout the work stoppage with attention to patterns and opportunities.• Evidence of Health Plan review of documentation in medical records to track training and work stoppage guidance was followed.• Evidence of Health Plan review of impacted member medical records to track appropriate outreach and offer of timely appointments.	<ul style="list-style-type: none">• For Southern California, these actions were implemented and measured throughout the work stoppage and are complete. The Plan confirmed there were sufficient providers (contingent workers and via our external network capacity) to offer members timely access. The work stoppage ended on May 8, 2025, and the Plan has transitioned members back to their therapists as appropriate.• Should any future work stoppages occur, these same actions and measurements can be used to validate oversight of communications, appointment cancellations and rescheduling, and resolution of member concerns.	Initiated: Q2 2024 Completed: Q2 2025

Corrective Action Area # 6 Mental Health Parity

This corrective action area includes actions the Plan is taking to support compliance with behavioral health parity laws. Specifically, the Plan is making the following changes and investments:

- 1. **Appropriate Service Offerings:** Monitor the appropriateness of service offerings based on the individual needs of the Plan’s members. Evaluate service offerings at the individual member level to confirm alignment with member unique needs. Monitor care decisions by providers through chart review of member treatment plans. Conduct regular reviews of out-of-network referrals to build-out the Plan’s network to better meet evolving member needs. Confirm there are no restrictions on medically necessary referrals, including referrals to out-of-network providers when in-network timely access is not available.
- 2. **Improve NQTL Process and Oversight:** Strengthen the Non-quantitative treatment program (NQTL) comparative analysis process to enhance rigor and consistency across dedicated regional teams of multidisciplinary stakeholders. Standardize escalation process for parity findings related to NQTL comparative analyses, chart audits, and all other sources. Increase Committees’ focus on compliance with parity laws and regulations.
- 3. **Policies and Procedures:** Conduct a comprehensive evaluation, and where needed, update policies and procedures to confirm they comply with parity laws and regulations.
- 4. **Member Education:** Review member-facing information and communications to confirm there is parity in how the Plan explains behavioral health services in comparison to medical services.
- 5. **Provider Education:** Offer, at no cost, training to its providers on the nonprofit clinical criteria that support treatment planning. Expand efforts to improve provider awareness of parity laws and regulations by developing toolkits and education materials to validate providers are well-informed of mental health parity.

Corrective Actions	Measurement	Progress	Anticipated Completion Date
Appropriate Service Offerings (CAWP 6(B) p.33)	<ul style="list-style-type: none">•Evidence of chart audit results to evaluate whether members were offered recommended treatment plan, at least monthly at regional BHQOC’s.•Report of out-of-network referrals to determine potential gaps in service array reviewed at least monthly.•Assessment of scheduling multiple follow-up appointments in advance.	<ul style="list-style-type: none">• The Plan expanded the scope of the treatment plan audit to capture whether members were offered the treatment plan recommendation by their clinician.• Kaiser Permanente has completed the design for implementation of a multiple appointment feasibility study. Initiated: Q3 2025 Completion: Q2 2026

Corrective Action Area #7 Member Communications

This corrective action area includes actions the Plan is taking to improve member communication. Specifically, the Plan is making the following changes and investments:

- 1. **Comprehensive Review of Plan Communications:** Review of direct member communications, advertising, and policies and procedures. Design comprehensive communication strategy regarding changes to the BH program. Provide members with information regarding expanded resources. Develop a process to evaluate communications to members. Evaluate training materials for staff & providers.

Corrective Actions	Measurement	Progress	Anticipated Completion Date
Comprehensive Review of Plan Communications (CAWP 7 (A-C) p.36-37)	<ul style="list-style-type: none">• Inventory of all member-facing communication campaigns.• Evidence of a communication campaign to increase member understanding of the range of BH services and of new assets to support access to care.• Evidence of reviews of CGAs and member satisfaction surveys.• Evidence of process map for approval of member-facing communications to track key behavioral health stakeholders review and approve materials for accuracy and completeness.• Inventory of all updated training material in regard to behavioral health services.• Documentation that direct member communications, advertising, and P&Ps were reviewed and procedures to regularly review them going forward.	<ul style="list-style-type: none">• The Plan continues to review communications directed to members, including, but not limited to, advertising to members and the general public, and other member facing materials to validate accuracy and completeness of information provided. This review takes into consideration current communication documents and vehicles that need to be updated to reflect the changes being made to the Plan’s behavioral health program and processes that will impact members. Communications include information regarding any changes to accessing care, the ability of members to obtain individual and group behavioral health therapy, the ability of members to obtain referrals to external contracted providers and out-of-network providers as required under SB 855, as well as alternatives to behavioral health therapy such as classes and smartphone applications.• The Plan has compiled the 2025 inventory of member communications.	Initiated: Q1 2025 Completion: Q3 2026

Corrective Action Area #8 Continuous and Detailed Review

This corrective action area includes actions the Plan is taking to evaluate programs, processes, policies and procedures, Medical Group performance, and access to urgent behavioral health services. Specifically, the Plan is making the following changes and investments:

- 1. **Comprehensive Evaluation of Behavioral Health:** Develop and implement comprehensive, continuous reviews of behavioral health and implement corrective actions, as needed. Reviews will occur at least annually and will be updated for progress at least quarterly. BH teams will evaluate results from actions included in the Corrective Action Work Plan to evaluate whether changes are working as intended and improving the member experience. Reviews will incorporate findings and insights obtained from all oversight actions outlined in the CAWP, including analyses of complaint and grievance data, access and network data, reviews of treatment plans to ascertain whether they are based on members' individualized needs, and a comprehensive assessment of the member experience. BH teams will document risks and develop and implement actions to mitigate risks identified or to course correct if the Plan is off track in achieving its goals. BH teams will leverage ongoing reviews to assess whether the Medical Groups are overseeing and delivering care to members consistent with both Kaiser Permanente's mission and applicable laws and regulations. BH teams' reviews will focus on the Medical Groups' role in care delivery, network management, contracting, and other key activities. Teams will document findings, opportunities, and areas of improvement regarding Medical Group performance as a direct care provider as well as its management of the externally contracted network. Any opportunities or gaps will be addressed in accordance with the Plan's review, assessment, and escalation pathways. The regional teams will develop a comprehensive plan for the following year that identifies specific goals, opportunities for improvement, and outlines refinements and actions to continue evolving Kaiser Permanente's behavioral health programs. The Plan leadership and committees will evaluate performance to identify opportunities for improvement, progress toward goals to track that the Plan is taking necessary steps to achieve the transformation of behavioral health. The Plan will take all necessary actions to promptly address problems as they emerge and achieve implementation of improvement plans.
- 2. **Systemic Review of Clinical Offerings:** Develop and implement regular, systemic evaluation of clinical offerings to evaluate BH programs and service offerings. Standards will be used to determine the effectiveness of service offerings, and the extent to which they are meeting member needs. BHQOCs will identify opportunities or gaps in programs or service offerings. Kaiser Permanente will work to address opportunities and gaps identified.
- 3. **Systemic Evaluation of Access to Urgent and Emergent Care:** Develop and implement regular, systemic and comprehensive evaluation of enrollee access to urgent behavioral health services, including the availability of providers to meet urgent and emergent care needs. Review and evaluate available information to assess whether timely, quality care is being provided. Assess the Plan's audit and review capabilities for providers to confirm that appointment access and timeliness of urgent appointments, as well as verify that workflows are documented and monitored for ongoing regulatory compliance. This work will include continually assessing the ways in which members seek urgent Behavioral Health care, streamlining and encouraging care coordination, assessing and addressing supply of inpatient beds, and evaluating the SCAL BHCL and NCAL after-hours line.

Corrective Actions	Measurement	Progress	Anticipated Completion Date
